# Student Goals

Student Goals allow educators to facilitate a student's personalized learning experience based on their individual needs and progression. This helps the student by implementing consistency through attainable goals, while allowing the teacher to monitor completion dates in real time.

The first step in modifying a course goal is to sign into Acellus and then search for a student using the **'Find a Student'** search bar located at the top right corner of the screen.
Next click the **'Student Account'** button located in the top right of your screen.
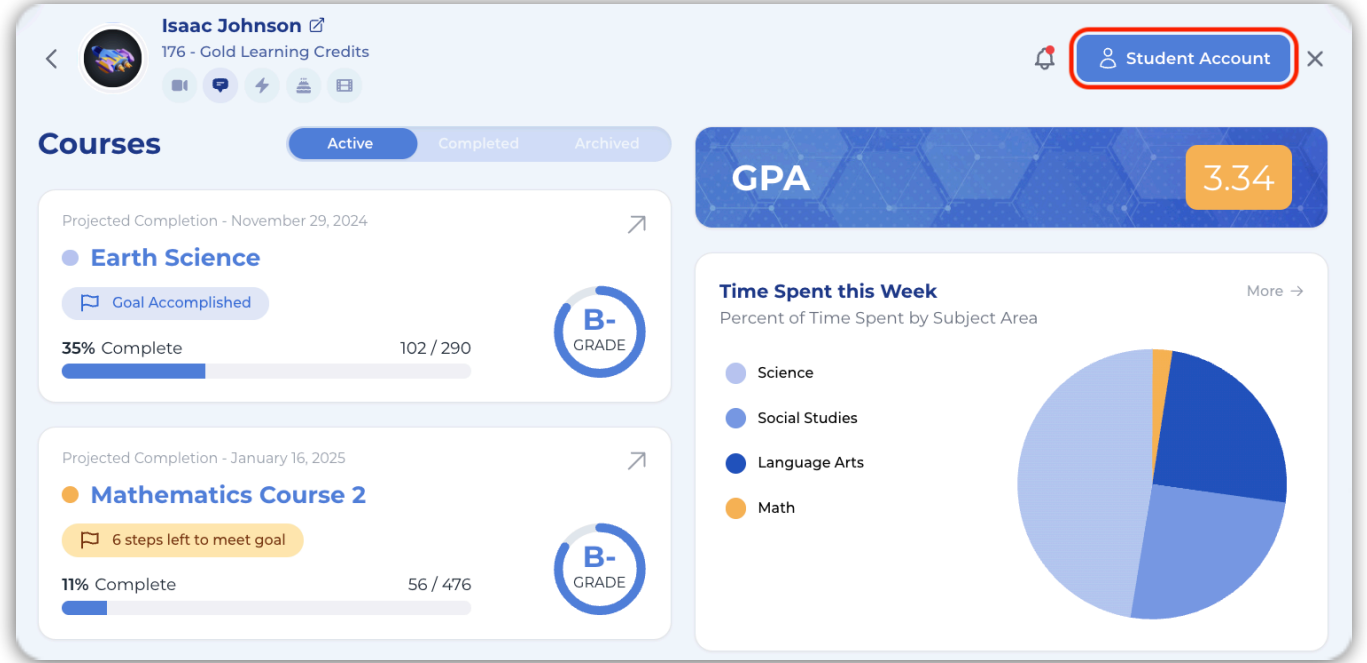

In the **'Courses'** section, teachers can set a weekly goal for each course. The default weekly goal is based on how many steps a student should complete each week to complete the course in an average school year/semester.

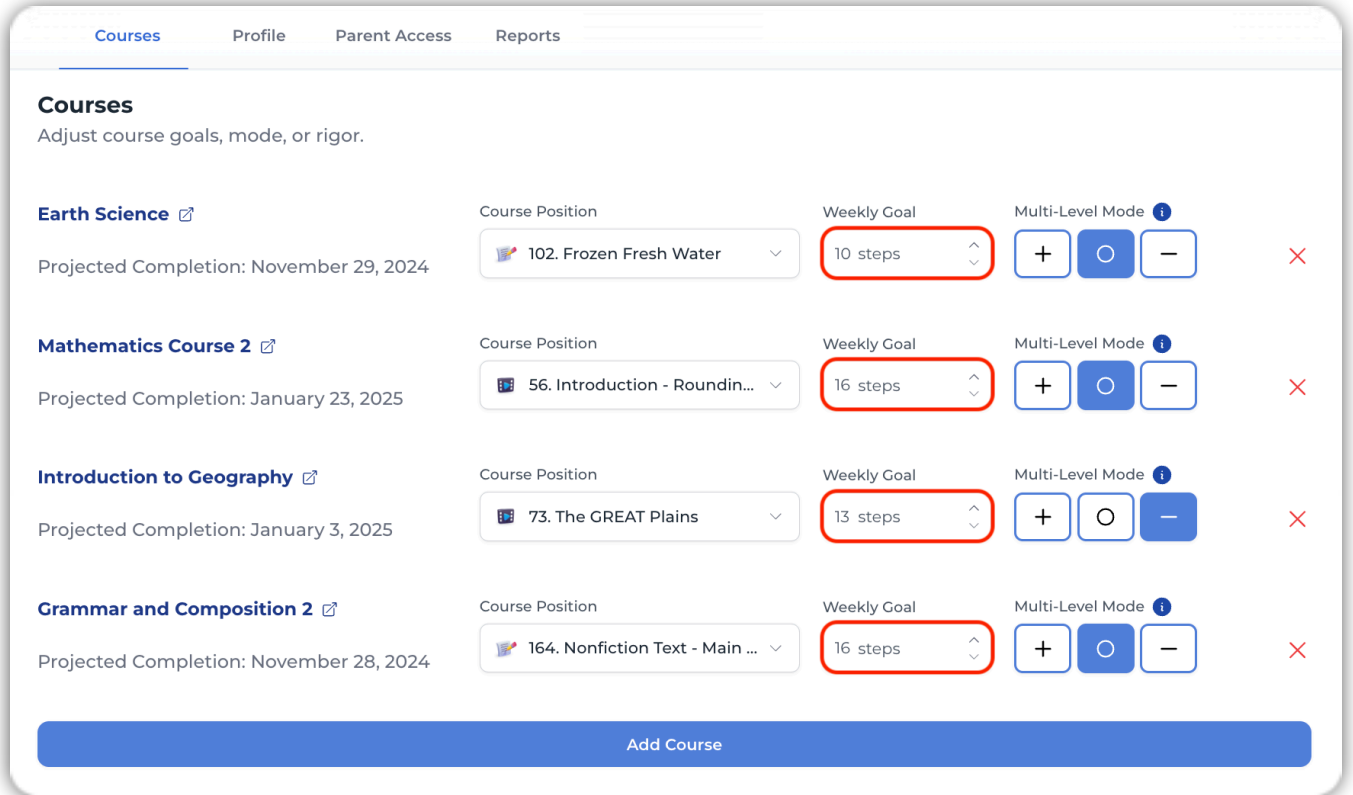

Note: Acellus courses are broken down into individual steps. Steps in Acellus can be instructional videos, sets of assessment problems, drills, reviews or exams.

The course's **"Projected Completion"** date will automatically update when one the following occurs:
- a teacher adjusts the weekly goal
- the student completes more than the assigned steps
- the student does not meet the weekly goal
Example: Teacher Adjusts Goal
Adjusting the weekly goal in **'Grade 3 Language Arts/Reading'** from 31 steps to 35 steps changes the **'Projected Completion'** from January <u>31st</u> to January <u>10th</u>.

Example: Student Completes More Assignments
If the student exceeds the weekly goal by completing 40 steps instead of the assigned 35 steps, it changes the **'Projected Completion'** from January <u>10th</u> to January <u>3rd</u>.

Example: Teacher Changes Course Mode

If the teacher adjusts the course mode from Default mode to the Tuned Learning mode, once the student completes another step, the **'Projected Completion'** date changes from January <u>3rd to December 13th</u>.

Under **"My Stats"**, clicking on the **'View Progress by Student'** allows you to check how students' are progressing with their daily goals. This list will track how many daily goals have been met out of the total. Once a student has completed all of their goals, they are removed from this list.
